

TTT Support

To achieve your targets and goals, you will probably need some support. Each team should write down:

- your targets
- the type of support you might need to achieve these targets – equipment, resource, information etc.
- where you might get this support – local business, fund-raising activities, the internet etc.
- what steps you need to take to get this support – phoning people, writing letters etc.

At the start of the project, you will have certain targets. As the project progresses, you will get additional targets, and some targets might change, so you will need to keep updating this template.

Team:

Targets	Support you need to achieve this target: equipment, resources information, money etc.	Where you might get this support	What steps you need to take to get this support
